ABOUT ME

Results-driven Software Developer with 5 years of experience in designing, developing, testing, and maintaining scalable software applications. Proficient in full-stack development, cloud technologies, database management, and software architecture. Experienced in collaborating with cross-functional teams to deliver high-quality software solutions that improve business operations and user experience.

PROJECT EXPERIENCE

E-Commerce App

- Design, develop, and maintain enterprise web applications.
- Build scalable backend services and RESTful APIs.
- Collaborate with product managers, UI/UX designers, and QA engineers.
- Review code, mentor junior developers, and enforce coding standards.
- Optimize application performance, security, and scalability.

Weather App

- Developed frontend and backend features for web applications.
- Built reusable components and integrated third-party APIs.
- Collaborated with QA teams to resolve bugs and improve software quality.
- Participated in Agile sprint planning and daily stand-up meetings.
- Maintained technical documentation and system specifications.

SKILLS

React JavaScript(ES6+) Git GitHub HTML CSS3

Responsive Design
